

HENCHMAN 2 HSM 9 cu. ft.

Towable Horizontal Shaft Mortar Mixers

The Henchman 2 HSM has the most reliable and powerful paddle drive system ever designed and manufactured for a 9 cu. ft. mortar mixer. No more jackshaft bearings, idler springs and exposed drive gears to maintain and worry about. The mixing paddles are driven by an enclosed oil bath gearbox and a huge centrifugal clutch. Run the Henchman 2 hard all day... **everyday!**

Production & Innovation

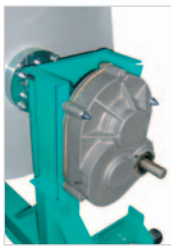

The **FOLIUM II** paddle design gets the job done. Laser cut paddles create lots of shear action - mixing a batch in 3 minutes is no problem.

Extra Value

Every mixer from IMER USA comes with a commercial duty tow hitch, not some welded on cheapie.

Ours Theirs

Ours: Gearbox drive to the paddle shaft. Reliable, safe, and very very powerful. – A historic achievement!

Theirs: Exposed gears running metal to metal, idler springs, jackshafts, pulleys, and grease everywhere. Dangerous, noisy, overly complicated contraption. – A prehistoric achievement!

Safety

Full width fenders prevent road spray from being thrown onto the mixer frame and other vehicles.

The torsion bar suspension provides both compression and rebound dampening.

Towing performance is the best in the industry, **no contest.**

Toughness

The jig welded box steel frame is strong and very rigid. Many times stronger than our competitors' channel steel frames.

Innovation

Dump 7 cu. ft. of mud real fast and real easy. The HENCHMAN 2 uses our autostop dumpwheel, which is a gear and seal reduction system originating in the aviation industry. When you stop rotating the dump wheel it locks the drum in place, **automatically!**

Production

Our all new **FOLIUM II** paddle design mixes all materials quickly and thoroughly, including aggregates up to 3/8". This mixing design provides a batch every 3 minutes.

HENCHMAN 2 HSM

Quick Specs

Drum capacity	9 cu. ft.
Batch output	7 cu. ft. (2½ bags)
Gas engine	8 h.p. Honda or 7 h.p. Subaru Robin
Drum diameter	24 Inches
Discharge outlet height	28 Inches
Pneumatic wheels	20"
Weight	650 lbs.
OPERATING DIMENSIONS (palletized)	
Length	76" (80")
Height	57" (64")
Width	49" (52")
