

BOOSTER 70

BOOSTER 70 | Model # BP070R002 | 71 HP Piston Pump

HIGH-PERFORMANCE DIESEL CONCRETE PISTON PUMP

The Booster 70 is a 7" piston pump for your toughest concrete pumping needs. Pumping pressure is over 1000 PSI making it ideal for pumping far and high. The diesel engine supplies all the power needed to complete your project in just about any application. Auto greasing system ensures that critical components are always lubricated and running smoothly.

Technical specifications

BOOSTER 70	
Maximum theoretical production	70 yd ³ /h
Maximum pumping pressure	1,160 psi
Maximum number of cycles per minute	33 min
Motorization	YANMAR / KUBOTA diesel water cooling
Installed power	71 (tier 4F) HP
Pumping system	Twin cylinder with hydraulic control
Maximum aggregates size	1 1/2"
Rods	7" x 39 1/2"
Pumping cylinder	7"
Piping outlet diameter	6"
Hopper capacity	1/2 yd ³
Weight	6,834 lbs

CONTROL PANEL

(*) Warning: Cancer and Reproductive Harm - <https://www.p65warnings.ca.gov>

(**) The max flow rate and the max pumping pressure cannot be performed at the same time.
